Report on Foreign Internship at St. Petersburg, Russia

Saint Petersburg is the second largest city in Russia and I am proud to choose this city for my internship. This city is often referred to by locals as **St. Pete**. Internship at **St. Petersburg, Russia** was one of the unique experience of my life. My internship started from **11th January 2016** to **22nd February 2016**.

The project allotted to me was "**Global Community Development Project**". The main objective of this project was to spread awareness about different cultures of different countries and enlighten the young minds with importance of English language in present world, especially among the students of Russian schools.

The project consisted around 15 interns from different countries like **India, China, Brazil, Hungary, Turkey, Egypt, Ghana, Mexico, Nicaragua, Bulgaria, Czech Republic, Serbia and Bahrain**. All the interns were divided into different groups and every group was supposed to go to different schools for promoting English. The group was asked to take English classes of the students. We worked four days a week. During my internship I also got chance to become part of "**Winter National Conference of AIESEC**" which was organized in **Yekaterinburg**. At this conference interns from all over Russia took part and was a great learning experience. During my stay I got chance to visit **Moscow** too.

The whole duration of mine internship was a nice experience giving and was full of learning. I was able to extend my contacts abroad. All I can hope that this internship may be my life changing experience. I would like to thank **Poornima Foundation** for providing me such a wonderful opportunity.
