

March 30–31, 2017

PROGRAM REPORT TO BE PRESENTED
AT THE VALEDICTORY SESSION

– by Dr. Swati Jain

Hon'ble Shri Rahul Singhi, Director, Poornima Group of Colleges, my colleagues, dear students and participants of the program, I welcome you all in the valedictory session of Gestion 2017. I feel privileged to extend a warm welcome to Shri Rahul Singhi and express my sincere gratitude to him for sparing his valuable time despite other pressing commitments to be with us in this session to take feedback of the program, distribute prizes to the winners and deliver the valedictory address.

I would like to present to you a brief report on the various events and happenings of this two day fest.

This two day management fest was organized by Poornima School of Management with a thought and vision to provide a platform to budding managers to showcase their professional talents and whet their skills to meet the challenges of the real world. Gestion upholds the nuances of ethnicity and modernity keeping in view the cultural, traditional and the global perspective.

I am glad to report that the fest has been lively and inter-active. 16 MBA and other colleges have participated in this program. It's an enormous delight for me to name all the colleges that made Gestion 2017 a grand success.

The program was declared open by Dr. Dr. K.K.S Bhatia, President Poornima University on 30 March, 2017, the Chief Guest in the opening session of the event.

Gestion covered various management and cultural events like Business Plan, Non gas cooking, Business Quiz , Group Dance, Solo Dance, Nukkad Natak, Face Painting, Hand Painting, Mehendi Designing, Tattoo Making, Rangoli Making, Mr. and Ms. Gestion, Kite Fighting, Solo Song and Photography

It has been a wonderful experience to conduct and manage the whole show along with a strong team of students of Poornima School of Management. Sir, I must say a word of appreciation for them for such incredible endeavor and dedication in organizing the event. We are really proud of their strength and capabilities.

Thank you.
