Brief Report

On

C-DAC SESSION AT PGI

On 20th March 2015, a screening test followed by a seminar was organized for 3rd Year, EC- A and EC- B, at PGI seminar Hall by CDAC, Jaipur (Centre for development of Advance Computing). The seminar was conducted by Dr. Manoj Sharma (Head C-DAC, Jaipur). In seminar Dr. Manoj gave a brief introduction about CDAC in which he told about how CDAC was originated. Supercomputers were first developed in America. When American government denied the demand of supercomputers in India, the two programmers came forward to develop India's own first supercomputer named PARAM 8000. This led to the formation of the organisation CDAC. The latest supercomputer in India, developed by CDAC, is known as PARAM YUVA. Further many other products developed by CDAC were mentioned by him which made the students aware about how CDAC can be an important step for boosting their career and he also proposed an opportunity to them regarding training programs. He conducted a screening test for all 3rd year students which included general aptitude, logical reasoning and basics of C programming. On the basis of this test, he promised to select 10 students from the branch who scores 60% or above marks to provide scholarships & free training to these selected students. **10 selected candidates for Free Summer Industrial Intern-ship are mentioned below in blue color and waiting list of candidates in green color.**
