

POORNIMA FOUNDATION

3rd November 2015

Report On Second Day Of PRAYOGAM 2015

The second day of Prayogam 2015 i.e. November 3, started with the same zeal as previous day. The air had a pleasant smell of enthusiasm. About **21 schools** visited Poornima University, took part in various activities and learnt new technologies used in projects showcased. Over all response of students was so positive and had great vibe that could be heard easily even outside the campus. Even the developers of various projects were astonished to get the feedback. The projects showcased were same as on the first day with new energy.

The main focus of all projects was on the Energy Conservation. In spite of such a big crowd the event was totally under control under the guidance of respective faculty coordinators. Different projects like smart city, aeromodelling, water rocketry, machine mania etc. were displayed. The best thing was this year Poornima Foundation gave chance to all start-ups of Poornimites for showcasing their work.

The decoration of the area constituting the event of fashion designing had a different eye catchy view which mesmerized the audience. Also the dresses showcased were appreciated by everyone.
