

Aadhar 2K12

An Innovative Techno Fest

Engineering project is a particular type of technological system, embedded in the context of technological systems in general. Poornima Group gives the students the platform to enhance their technical skills by making projects from I Year itself. In the current session the students were motivated to make projects in “Electrical/ Electronics/ Mechanical Engineering”. Department of first year has organised an innovative techno fest AADHAR 2K12 to demonstrate the projects made by students of first year. It was a proud privilege for the department that about 48 projects were displayed by the students in the competition. The projects were made on different themes based on Robotics, Hydro pressure, Auto Motion and Machine Design. The competition had five different events where students demonstrated their talent-Robo-War, Robo-Race, Hydraulic Lifting, Mechanical Designing and Automatic Lifting. The competition was visited and appreciated by the dignitaries of Poornima Group of Colleges and Poornima University. Dr. S. M. Seth (Chairman PJ); Sh. Shashikant Singhi (Director General, PGC); Dr. R. P. Rajoria (Director, PCE); Prof. Ajay Bansal (Director, PCE); Prof. Manoj Gupta (OSD, PU); Dr. O. P. Sharma (Principal, PCE); Dr. Rekha Nair (Dean, First year), appreciated the work of the students and motivated them for a more better performance. About 100 students of Poornima University were the visitors of the program along with all the students of Poornima College of Engineering.
